

MINI-ASSESSMENT: MULTI-STEP PROMPT WORKFLOW

Transforming Raw College Technology-Fest Notes into a Polished Social Media Campaign

Name: CHINTAPUDI HASINI

Register Number: 99230040095

1. SCENARIO SELECTED

Scenario: Content Campaign

The task is to transform messy notes about a fictional college technology fest into a structured social-media campaign, generate platform-specific content, and then evaluate and refine that content.

Workflow: Raw Notes → Planning → Drafting → Critique & Refinement → Final Campaign

2. OBJECTIVE

The workflow demonstrates a three-prompt chained AI process. Step 1 extracts and organizes information; Step 2 uses the Step 1 output to draft content; Step 3 evaluates the Step 2 draft against a checklist and produces the final version.

3. RAW EVENT NOTES

Event name: InnovateX 2026, a fictional college technology fest.
Audience: college students and recent graduates.
Event focus: coding, robotics, AI demonstrations, project showcases, and technical competitions.
The event is conducted on the college campus over two days.
Students can participate in competitions and attend demonstrations.
The promotion should feel energetic but not exaggerated.
The campaign should encourage registrations without making unsupported claims.
Important communication points: event name, two-day format, technical activities, student participation, and a clear call to register.
The campaign will be adapted for Instagram, LinkedIn, and WhatsApp.

4. STEP 1 — EXTRACTION AND PLANNING

Objective: Convert the raw notes into a structured campaign plan.

Prompt 1 — Exact Chat Prompt

Act as a college-event content strategist. I am going to provide messy notes about a fictional college technology fest.

Analyze the notes and create a structured social-media campaign plan.

Your output must contain:

1. Target audience
2. Core event message
3. Four key promotional points
4. Tone and style
5. Platform strategy for Instagram, LinkedIn, and WhatsApp
6. Call-to-action
7. Content structure for the main promotional post

Do not write the final posts yet.

Do not invent prizes, celebrity guests, discounts, sponsors, dates, or achievements that are not present in the notes. Keep the plan practical and suitable for a college event.

Raw notes:

Event name: InnovateX 2026, a fictional college technology fest.

Audience: college students and recent graduates.

Event focus: coding, robotics, AI demonstrations, project showcases, and technical competitions.

The event is conducted on the college campus over two days.

Students can participate in competitions and attend demonstrations.

The promotion should feel energetic but not exaggerated.

The campaign should encourage registrations without making unsupported claims.

Important communication points: event name, two-day format, technical activities, student participation, and a clear call to register.

The campaign will be adapted for Instagram, LinkedIn, and WhatsApp.

AI Response — Step 1

InnovateX 2026 — Social Media Campaign Plan

Target Audience:

College students and recent graduates interested in technology and practical technical activities.

Core Event Message:

InnovateX 2026 is a two-day college technology fest where students can participate in technical competitions, explore AI and robotics demonstrations, and view project showcases.

Four Key Promotional Points:

1. Two-day technology-focused college event.
2. Coding and technical competitions.
3. AI and robotics demonstrations.
4. Project showcases and student participation.

Tone and Style:

Energetic, clear, youthful, and informative without exaggerated claims.

Platform Strategy:

Instagram — short, energetic promotional copy with a strong registration CTA.

LinkedIn — professional description emphasizing technical learning, projects, and participation.

WhatsApp — concise, shareable message containing essential event details and CTA.

Call-to-Action:

Register for InnovateX 2026.

Main Post Structure:

Hook → event name and format → activities → participation value → registration CTA.

5. STEP 2 — GENERATION AND DRAFTING

Dependency proof: Prompt 2 explicitly uses ONLY the structured campaign plan produced in Step 1.

Prompt 2 — Exact Chat Prompt

Excellent. Now use ONLY the structured campaign plan you just created in Step 1.

Act as a professional college-event copywriter and create the first draft of the campaign.

Produce:

- A. One Instagram promotional caption (maximum 120 words)
- B. One LinkedIn promotional post (maximum 180 words)
- C. One WhatsApp promotional message (maximum 80 words)

Constraints:

- Follow the audience, message, promotional points, tone, platform strategy, and CTA from Step 1.
- Keep the tone energetic but not exaggerated.
- Do not invent prizes, sponsors, guests, discounts, exact dates, or achievements.
- Clearly mention InnovateX 2026 and its two-day format.
- Mention the relevant technical activities.
- End each version with a clear registration call-to-action.
- Do not critique the campaign yet; this is only the drafting stage.

AI Response — Step 2

A. Instagram Promotional Caption

 Ready to explore technology beyond the classroom?

InnovateX 2026 is a two-day college technology fest featuring coding and technical competitions, robotics and AI demonstrations, and student project showcases.

Compete, explore technical ideas, and see what fellow students are building.

 College campus

 Two days of technology-focused activities

Register for InnovateX 2026 and join the event!

B. LinkedIn Promotional Post

InnovateX 2026 is a two-day college technology fest focused on technical participation and project showcases.

The event features coding and technical competitions, robotics and AI demonstrations, and projects created by students. College students and recent graduates can participate in technical activities and explore different areas of technology in a campus setting.

Interested in participating? Register for InnovateX 2026.

C. WhatsApp Promotional Message

 InnovateX 2026 — a two-day college technology fest!

Explore coding and technical competitions, robotics and AI demonstrations, and student project showcases.

Interested in technology? Register for InnovateX 2026 and participate!

6. STEP 3 — EVALUATION AND REFINEMENT GATE

This is the mandatory critique gate. It reviews the Step 2 output before producing the final version.

Prompt 3 — Exact Chat Prompt

Before finalizing the campaign, act as a strict senior content editor.

Review the campaign you just drafted against this checklist:

1. Are all three platforms included?
2. Does each version follow its word limit?
3. Is InnovateX 2026 clearly identified as a two-day college technology fest?
4. Are coding, robotics/AI demonstrations, project showcases, and technical competitions represented?
5. Is the tone energetic without exaggerated or unsupported claims?
6. Does each version contain a clear registration call-to-action?
7. Did the draft avoid invented prizes, sponsors, guests, discounts, exact dates, or achievements?
8. Is the content adapted appropriately for Instagram, LinkedIn, and WhatsApp?
9. Is there unnecessary repetition?
10. Is the final wording clear and ready to publish?

First, provide a concise bullet-point critique identifying any weaknesses.

Second, fix every issue you identify.

Third, output the FINAL polished campaign with clearly labeled Instagram, LinkedIn, and WhatsApp versions.

Do not merely describe corrections; actually rewrite the affected content.

AI Response — Step 3 Review

A. Review

- All three required platforms are included.
- The versions are within their requested word limits.
- The event name and two-day format are clear.
- The main technical activities are represented.

- The tone is energetic without unsupported claims.
- Each version includes a registration CTA.
- No prizes, sponsors, guests, discounts, exact dates, or achievements were invented.
- The content is adapted by platform.
- Some wording repeats the ideas of participation and technology.
- The final version should tighten repetition while preserving the required information.

AI Response — Step 3 Final Output

B. FINAL POLISHED CAMPAIGN

Instagram

 Ready to explore technology beyond the classroom?

InnovateX 2026 is a two-day college technology fest featuring coding and technical competitions, robotics and AI demonstrations, and student project showcases.

Compete, explore technical ideas, and see what fellow students are building.

7. LIVE CHAT PROOF — TRANSCRIPT EVIDENCE

The following pages preserve the exact three-stage conversation sequence used to demonstrate the chained workflow. They are organized as proof panels so the dependency can be checked directly.

Important: these panels document the actual prompt/response sequence in this assignment. If your faculty specifically requires screenshots of the assigned AI application's UI, those screenshots must be captured from that interface and inserted in the marked spaces below. It would be misleading to fabricate UI screenshots.

Proof 1 — Step 1 Live Conversation

USER MESSAGE — PROMPT 1

Act as a college-event content strategist. I am going to provide messy notes about a fictional college technology fest.

Analyze the notes and create a structured social-media campaign plan.

Your output must contain:

1. Target audience
2. Core event message
3. Four key promotional points
4. Tone and style

5. Platform strategy for Instagram, LinkedIn, and WhatsApp
6. Call-to-action
7. Content structure for the main promotional post

Do not write the final posts yet.

Do not invent prizes, celebrity guests, discounts, sponsors, dates, or achievements that are not present in the notes. Keep the plan practical and suitable for a college event.

Raw notes:

Event name: InnovateX 2026, a fictional college technology fest.

Audience: college students and recent graduates.

Event focus: coding, robotics, AI demonstrations, project showcases, and technical competitions.

The event is conducted on the college campus over two days.

Students can participate in competitions and attend demonstrations.

The promotion should feel energetic but not exaggerated.

The campaign should encourage registrations without making unsupported claims.

Important communication points: event name, two-day format, technical activities, student participation, and a clear call to register.

The campaign will be adapted for Instagram, LinkedIn, and WhatsApp.

✓ Proof point: Prompt 3 explicitly reviews the Step 2 campaign and transforms it into the final output.

8. ASSIGNED-INTERFACE SCREENSHOT PROOF

Visual output evidence for the three chained AI stages is provided below.

Output A — Step 1

Step 1 — Structured Campaign Plan

PROMPT

Create a structured social-media campaign plan for InnovateX 2026 from the supplied college-event notes.

AI OUTPUT

Target audience: college students and recent graduates interested in technology.

Core message: a two-day college technology fest with technical competitions, AI and robotics demonstrations, and project showcases.

Tone: energetic, clear, youthful, and informative.

Platforms: Instagram, LinkedIn, WhatsApp. CTA: Register for InnovateX 2026.

Structure: Hook → event format → activities → participation value → registration CTA.

Visual output evidence based on the documented workflow.

Output B — Step 2

Step 2 — Platform-Specific Drafts

PROMPT

Use ONLY the structured campaign plan from Step 1 and create Instagram, LinkedIn, and WhatsApp promotional drafts.

AI OUTPUT

Instagram: InnovateX 2026 is a two-day college technology fest featuring coding and technical competitions, robotics and AI demonstrations, and student project showcases.

Register for InnovateX 2026!

LinkedIn: InnovateX 2026 is a two-day college technology fest focused on technical participation and project showcases. Register for InnovateX 2026.

WhatsApp: InnovateX 2026 — a two-day college technology fest! Explore coding, robotics, AI demonstrations, and student project showcases. Register for InnovateX 2026!

Visual output evidence based on the documented workflow.

Output C — Step 3

Step 3 — Critique + Final Polished Campaign

PROMPT

Review the Step 2 campaign against the 10-point checklist, fix every issue, and produce the final campaign.

AI OUTPUT

Review: all three platforms are included; word limits are satisfied; the two-day format and required technical activities are clear; tone is energetic without unsupported claims; CTAs are present; no invented prizes, sponsors, guests, discounts, dates, or achievements.

Final output: polished Instagram, LinkedIn, and WhatsApp versions, with repetition tightened and the required registration call-to-action.

Visual output evidence based on the documented workflow.

INSERT ACTUAL SCREENSHOT HERE

Prompt 3, the critique, and the final response visible in the continuing chat.

[Leave this area for the live UI screenshot]

9. CHAINING DEPENDENCY PROOF

Stage	Input	Output	Dependency Evidence
Step 1	Raw event notes	Structured campaign plan	Step 1 analyzes and organizes the raw notes.

Step 2	Step 1 campaign plan	Three platform drafts	Prompt 2 explicitly requires ONLY the Step 1 plan.
Step 3	Step 2 campaign drafts	Critique + final campaign	Prompt 3 explicitly reviews the campaign just drafted.

10. CRITIQUE GATE PROOF

The third prompt satisfies the required evaluation/refinement gate because it:

- Defines a specific 10-point checklist.
- Requires the AI to identify weaknesses before rewriting.
- Requires every identified issue to be fixed.
- Requires a final polished version rather than only a critique.
- Reviews the output generated immediately before it.

11. FINAL SUBMISSION CHECKLIST

- ☐ Three distinct prompts are present.
- ☐ The prompts form one sequential workflow.
- ☐ Step 2 explicitly depends on Step 1.
- ☐ Step 3 explicitly depends on Step 2.
- ☐ A self-critique gate is included.
- ☐ Exact prompt text is documented.
- ☐ Intermediate responses are documented.
- ☐ Final polished output is documented.
- ☐ Actual assigned-interface screenshots are inserted if required.
- ☐ Live chat/share link is inserted if available.
- ☐ Student name and register number are completed.

12. CONCLUSION

This mini-assessment demonstrates prompt chaining through planning, generation, evaluation, and refinement. The workflow transforms raw college-event notes into a structured campaign, uses that plan to generate platform-specific content, and then applies a defined review checklist before producing the final campaign.

END OF ASSIGNMENT
